

ENGINEERED PRODUCTS

STATEMENT OF QUALITY POLICY, OBJECTIVES AND CONTROL

QUALITY POLICY

Uniroyal Global Limited aim to achieve Total Quality Excellence in meeting the requirements of customers - both internal and external.

Total Quality Excellence means identifying and understanding the customer's requirements and meeting those requirements without error, on time, every time.

This will be achieved by adopting a Quality Assurance System, utilising processes, procedures and techniques which will consistently manufacture products of appropriate quality standards in order to provide a high level of customer satisfaction in the most cost effective manner.

To establish at all levels the acceptance of a policy to work towards zero defects production.

To maintain a policy of seeking continuous improvement in all aspects of quality, culminating in the achievement of zero defects.

QUALITY OBJECTIVES

To ensure all products fully meet the requirements of the customer in terms of specification, reliability, performance and delivery dates.

To continually improve all aspects of the Company's activities in order to promote an environment conducive to quality improvement.

To manufacture products of a superior standard to our competitors.

CONTROLLING QUALITY

The responsibility and authority for maintaining, controlling and co-ordinating the Quality Systems is invested in the Technical Quality Assurance Manager, who has the authority to prevent despatch of non-conforming products.

It is the responsibility of all personnel in all functions from design to delivery to the customer, to achieve, monitor and maintain the quality of the service performed.

Decisions on product conformance are based on objective evidence of quality that is generated, by monitoring the products throughout the process.
